

How can I support my team to provide better palliative care?

The Team Action section of the ELDAC Primary Care toolkit provides resources to support your team in providing quality palliative care and advance care planning.

The toolkit connects you with evidence-based resources and systems information including MBS, My Health Record and more.

Information found in the Team Action section of the toolkit includes:

- Quality Improvement and how teams can help to create a safe and high-quality healthcare system;
- Tools for practice managers with clarification on MBS reimbursement for the delivery of palliative care services;
- My Health Record, including what palliative care and advance care planning information can be stored in a patient controlled medical record and how this information can be shared;
- Engaging with other organisations and forming meaningful partnerships to improve the provision of palliative care.

End of Life Directions for Aged Care (ELDAC) is a free, government-funded resource. The Primary Care toolkit connects you with evidence-based tools in palliative care and advance care planning.
